

SchoolTrip

Schooltrip is a tool that allows students to create their own school journey. Through an online interface the teacher can set a couple of parameters defining the skeleton of the trip. Students fill the template with information on practicalities, cultural heritage sites to visit, historical information, and so on. They learn to plan a travel from a to z, while incorporating our cultural heritage. At the end, a journal-like document is generated which can be used as itinerary guidebook.

 - ◆ [3.2 You are a student](#)
- [4 Installation instructions](#)
- [5 Your feedback](#)

Introduction to the training materials

The training materials are composed of three main sections:

- SchoolTrip getting started: a simple overview of things to keep in mind before creating a SchoolTrip.
- SchoolTrip manual pages: text and screenshots on how to work with the various SchoolTrip components. Different manuals are available for the teacher, or the student using the tool.
- SchoolTrip source code: find out where to get the source code under MIT license.

SchoolTrip getting started

First time using SchoolTrip to plan your journey? Check the [SchoolTrip Getting started page](#). A comprehensive **ready-to-print** [SchoolTrip manual](#) is also available in PDF-format.

SchoolTrip manual pages

You are a teacher

Error creating thumbnail: File missing

1. [Registration and login](#)
This manual explains how to create a user account or login on the SchoolTrip interface
2. [Create new SchoolTrip](#)
Explanation of the interface and components to create a new Trip
3. [Manage groups and users](#)
Manage groups and the users who have access to your Trip(s)
4. [SchoolTrip interactive features \(teacher\)](#)
Explains the community chatboard feature, notifications and help

You are a student

Error creating thumbnail: File missing

1. [Login instructions](#)
Learn how to login to your SchoolTrip account
2. [Adding the information](#)
